cranes & rigging

AOR IS YOUR ONE STOP LIFTING SHOP!

With extensive experience, AOR has the capabilities to carry machinery removals and installations, on site welding, traffic control and all your site access equipment requirements.

Established in 1992, AOR has extensive experience on a broad range of crane and rigging projects.

Our experienced team will make sure that your project is a success with site inspections, job planning and supply of all lift studies, Job Safety Analyses along with Safe Work Method Statements.

RIGGING SERVICES

All Over Rigging are Confined Spaces Certified and our team has had extensive experience in rigging structural and architectural steel and with machinery installations.

With our own cranes and equipment we have had experience with most commercial and industrial applications.

Call us for an obligation free quote today. References are available.

AOR is a member of the Crane Industry of Australia and prides itself in working to all OH&S regulations.

OUR CRANES

Our current fleet is designed to suit most requirements but should your project extend beyond these cranes we are happy to organize additional resources to suit your needs.

AOR is a Member of the Crane Industry Association of Australia; our equipment is serviced to the highest standards and comes with logbooks and Crane Safe Certification as per OH&S Standards.

Cranes

- 3 Ton Maeda MC305C Crawler Crane
- Tadano TR – 160M-3 Rough Terrain Crane
- Liebherr LTM1040/1 All Terrain Crane
- IVECO Crane Truck with a Palfinger Crane

Ancillary equipment includes:

- Spreader Bars, Bins, Brick cages, Personnel Box's.
- Fully equipped utes with welders, core drill machines, drills and all associated equipment to carry out onsite rigging and fitting duties.

“We’ve built a strong reputation with our clients for ‘getting the job done’ with the minimum of fuss.”

***Baz Casey,
Managing Director***

EXTENSIVE EXPERIENCE

Since our inception in 1992 we have worked on numerous projects in the Sydney metro area, NSW regional areas and interstate.

Over the years we have had a strong alliance with Sydney Water and worked on many of their projects and site upgrades including:

- North Head Sewerage Treatment Plant,
- Rouse Hill Recycled Water Plant,
- Glenfield & Liverpool Sewerage Treatment Plant upgrades and renewals
- The Desalination Plant at Kurnell, where we built the Delivery Pump Station and Electrical Switch Room for the Delivery Alliance.

Other projects include:

- AOR was also involved in the erection of the 'count-down' clock for the Sydney Olympics which required the installation and dismantling on top of Centre Point Tower in Sydney's CBD.
- AOR has also built Dewatering plants at Cadia Gold Mine in central NSW, Kincumber Sewerage Treatment plant and various other locations.
- We have extensive experience with **structural steel installation** on all sizes of applications from private homes to the grandstand construction at Manly Rugby Oval.
